Objectives / Areas for Improvement and Development	<p>Our visit to Sha Tin Road Safety Park was a meaningful learning experience that connected well with the children's current theme at school. The objective of the activity was to give the children real-life practice of the road signs and traffic rules they had already learned about in class. As they were already familiar with the topic, they were able to confidently talk about road signs, traffic lights, and safety rules, and apply their knowledge while riding bikes in a safe and realistic environment. The park provided a valuable opportunity for hands-on learning, helping the children strengthen their understanding through practical experience. As a teacher, it was rewarding to see the children make connections between classroom learning and real life, while also developing their confidence, independence, and awareness of road safety.</p>
